Strategic Objective 1.2 – Provide marketable skills and knowledge to increase workers’ incomes and help them overcome barriers to the middle class through partnerships among business, education, labor, community organizations and the workforce system

Analysis and Future Plans

Employment and Training Administration

In PY 2014, ETA worked to increase the number of participants earning industry-recognized credentials (a DOL Priority Goal in FY 2012-15) through investments in youth education and training under the WIA Youth (Youth), Job Corps, YouthBuild, and Reintegration of Ex-Offenders (RExO) programs, and through increased collaboration with Registered Apprenticeship program sponsors (including employers) and the workforce and education systems via the Apprenticeship program.

As noted in the narrative for Strategic Objective 1.1, implementing WIOA continues to be ETA’s primary focus in FY 2016/PY 2015.

In FY 2015, credential attainment jumped from 59.0 percent in FY 2014 to 67.1 percent in FY 2015 for the programs contributing to this DOL Priority Goal, including Adult, Dislocated Worker, National Emergency Grants (NEG), Youth, Trade Adjustment Assistance, Apprenticeship, REXO, Job Corps, and YouthBuild. ETA continued working towards increasing awareness, accuracy, and focus in the workforce system on the attainment of industry recognized credentials. This work included providing guidance and technical assistance to state partners and grantees.

Literacy and numeracy outcomes (measured by the percent who gained one Adult Basic Education (ABE) level in either category) increased slightly in PY 2014 for YouthBuild participants but fell by almost two percentage points for Youth participants and fell by almost three percentage points for Job Corps students. While the literacy and numeracy gains measure decreased slightly for Youth, it continues to remain well above the target at more than four percentage points higher than the target. The literacy and numeracy rate for Job Corps’ has declined over the past two years, however, Job Corps continues to establish aggressive performance targets and was able to achieve 95 percent of the targets. Per WIOA, this measure will be replaced in PY 2016 with a measure of skills gains.

The percent of Job Corps students who earned credentials (e.g., diploma, high school equivalency, or certificate) dropped in PY 2014 by three percentage points. For the same measure, the YouthBuild result increased from 66.84 percent in PY 2013 to 68.32 percent in PY 2014, and the Youth result was slightly lower than in PY 2013. For Job Corps, industry-recognized certification attainment increased to 95.50 percent from 93.50 percent the previous year. Placement in employment, continued education, or the military increased for Job Corps, YouthBuild, and Youth participants in PY 2014 as compared to PY 2013.
The RExO Entered Employment Rate for Non-Youth decreased by almost six percentage points in FY 2014, and the Recidivism Rate for Non-Youth increased by almost two percentage points. DOL will be working with these grantees to improve their outcomes. Additionally, due to the numerous ways recidivism rates may be measured, adult offender grantees have been reporting inconsistent rates. The recidivism rates found by Social Policy Research using state criminal records data in their random assignment evaluation of previous RExO-Adult grants were much higher than those reported by RExO-Adult grantees. To ensure accuracy, the Chief Evaluation Officer is working with ETA to develop a way to obtain program enrollees’ recidivism rates directly from criminal justice system records data.

In FY 2015, the Number of Active Registered Apprentices Nationally increased to nearly 450,000. This represents a nine percent overall increase (37,554) from the start of the Fiscal Year. In September 2015, DOL awarded $175 million in grant funding to expand Registered Apprenticeship programs in high-skilled, high-growth industries. ETA expects the new grant funding combined with a continued focus to increase the number of active apprentices through its Leaders of Excellence in Apprenticeship Development, Education and Research (LEADERs) initiative, regional Sector of Excellence in Apprenticeship (SEA) efforts, and continued Administration support will raise the number to 500,000 in FY 2016. This measure is an indicator for a DOL Priority Goal for FY 2016-17, with a target of 600,000 apprentices by September 30, 2017. Other related results include a $157 improvement in Apprentices’ six month average earnings compared to FY 2014. While the completion rate (timely receipt of a certificate) declined slightly from 46.00 to 45.15 percent in FY 2015, it still remains comparatively higher than average 2- and 4-year college graduation rates.

ETA – Increase the number of participants earning industry-recognized credentials.

The Six Months' Average Earnings for program completers was $31,124 which is over $6,675 more than that of all program exiters (i.e., completers or those who cancelled).

The speed of the economic recovery has helped generate new apprenticeships across the county but has not translated into ubiquitous wage gains over the last year.

Beginning in PY 2016, Six Month Average Earnings will be discontinued. The new WIOA measure will be Median Earnings of those employed in the 2nd quarter after program exit.

**Notes:** Targets for most of the programs that support this strategic objective have been revised [r] based on a regression model that accounts for the effect of unemployment rates on program performance outcomes and OMB’s assumptions about future economic conditions. The Entered Employment Rate for Non-Youth (REO) performance measure result reflects program-to-date data (since program inception in Spring 2006).
